

Greg Corbett

SMEDG talk, 5:30 pm for 6:00pm, Thursday 24th July, 2014

Gold Discovery in Papua New Guinea

A talk dedicated to the memory of Gavin Thomas

Greg draws on 35 years' experience in Papua New Guinea, in particular a 2005 review for the PNG Government to describe his understanding of the discovery histories of many projects in Papua New Guinea varying from earliest pre-colonial reports, to initial 19th and then 20th century prospecting, modern era of regional geological and geochemical surveys, and finally conceptual exploration.

Greg has advised that this presentation was born out of a request by Graham Teale for Greg to give a discovery style talk to the AIG in Adelaide recently. It will be a talk on the history of exploration from a geological perspective.
