

AIG Handbook 5

Structural Logging of Drill Core

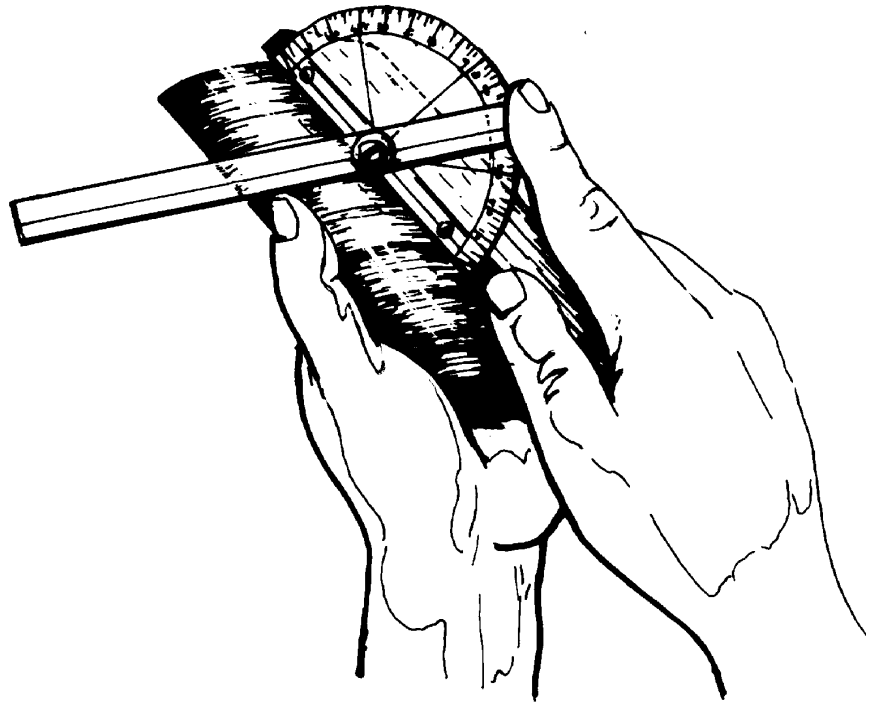

By Roger Marjoribanks

*Economic and Structural
Geology Consultant,
Perth Western Australia*

Structural Logging of Drill Core, the latest publication in AIG's Handbook series, is now available. The handbook covers a range of topics including:

- **Structural observations on oriented and non-oriented core**
- **Core orientation techniques**
- **How to recognize structures in drill core**
- **How to measure structure in oriented core**
- **Recording structural observations**
- **How to plot data on drill sections**
- **Stereonet techniques**

The Australian Institute of
Geoscientists
PO Box 606
West Perth WA 6872
www.aig.asn.au

Structural Logging of Drill Core is written for both students and experienced geoscientists interested in further refining their skills in recording and interpreting information observed in drill core. The handbook will be produced in a robust, A5 format, making it ideal for both office and field use.
