BEYOND THE ROCKS EXPLORATION FORUM – COMPLIANCE, COMMUNITY AND ENVIRONMENT

Beyond the Rocks Exploration Forum will provide updates on the latest in regulatory compliance, community engagement and environmental management. Speakers from government, industry and community will present the latest information and leading practices to ensure you are up to date on all the issues for NSW explorers 'beyond the rocks'.

* DETAILS TO BE CONFIRMED AFTER STATE ELECTION

Over two days in Sydney, these events will give explorers an insight into the latest geological information and new and emerging regulatory compliance, environment and community issues in NSW to help drive innovation and continuous improvement.

Professionals from across the minerals industry are encouraged to attend both days. Junior exploration companies to multinational operators in the coal and metalliferous sectors, as well as consultants, industry partners and government will be well represented. Registration opens in April, and be quick as numbers are limited.
