

Geoff Derrick TIA 'G M Derrick Geology'
presents the
Mt Isa Geotour 2006
From the Horse's Mouth

Friday 4 August - Friday 11th August 2006

This is yet another opportunity to see aspects of one of the most mineralised and studied Proterozoic provinces in the world. Geoff has long-standing expertise in the area, and has added to this all the results that matter from the detailed research of the past decade or more.

Come away with Geoff for 7 days, to hear it from the horse's mouth

DRAFT PROGRAMME:

The *Horse's Mouth Geotour* will cover aspects of most geology of the Inlier, including Zn,Cu and U mineralisation controls in the western belt, Ernest Henry Cu-Au & Mary Kathleen U in the eastern belt, together with all the linking lithostratigraphy and basin analysis and settings required to place mineralisation in context. The Geotour spends three nights in Mt Isa, one night in the Kalkadoon Hotel at Kajabbi, and three nights in Cloncurry, and transport is by 4WD vehicles. Scarce accommodation has limited places on the Geotour to about 12 people maximum; a minimum for the tour to proceed will be 7 people. The programme below is just a taste and summary of the magnificent and world class geology to be seen on this tour. Costs are as per 2005, despite rising fuel and motel prices.

| | | |
|-----------------|--|----------------|
| Friday 4/08/06 | Arrive Mt Isa noon; local geology pm, including low grade rift fill and metamorphosed equivalents | Stay Mt Isa |
| Sat. 5/08/06 | Visit Summit Resources - drill core from U prospects, local geology including growth faults and Isa Group lithostratigraphy | Stay Mt Isa |
| Sun 6/08/06 | Lawn Hill platform, rift to platform geology, Cu at Mt Gordon | Stay Mt Isa |
| Mon. 7/08/06 | Mt Isa geology to noon; drive to Kajabbi - basement- cover relations; NOTE: discussions with XStrata ongoing re exposure to Pb-Zn, 4-7 th . | Stay Kajabbi |
| Tues. 8/08/06 | Cross section of Inlier geology in north, plus junior Cu shows and eastern succession geology and alteration | Stay Cloncurry |
| Wed. 9/08/07 | Ernest Henry Cu-Au; Soldiers Cap Gp geology, BIF and exhalite, granites and hematite breccias | Stay Cloncurry |
| Thur. 10/08/06 | Highway traverse - eastern succession, BIF, Ba units, Mary Kathleen open pit U and skarns, platform carbonates | Stay Cloncurry |
| Friday 11/08/06 | Travel to Mt Isa for noon departure; other flights depart 6pm. | |

TOTAL COST of the Geotour \$2,100 PER PERSON

(includes guidebook, all meals, accommodation and transport on tour in the Mt Isa Inlier; *airfares to and from Mt Isa are NOT included.*)

BOOKING FORM

Fill in the spaces below in this WORD table document, and return ASAP, as places are limited !!
