## Professional Summary

---

Graduate geoscientist seeking to gain work in the field of exploration. I find geology and the variety of subjects it involves fascinating. I have an enthusiasm grounded in my commitment to be a professional geologist, and consequently to become an asset to any company I am involved with.

## Education

---

### University of New England (2010 – 2014)

Bachelor of Geoscience

Completed my final trimester within this degree - majoring in mineral deposit geology.

Subjects studied include:

- exploration geochemistry
- resource geology
- igneous petrology
- field sampling and mapping

### Sydney University 1993

Bachelor Science (Chemistry)

## Core Strengths

---

- My background in analytical chemistry, combined with recent geochemical studies allows me to implement and carry out sampling programs, whilst minimizing contamination.
- Studying externally has taught me time management skills required to meet report deadlines
- A passion for sailing has led me to being able to work in a team as part of a crew in offshore races.
- Regularly volunteering my time helping out at the local fun run gives me some community spirit

## Certification

---

Qld portable XRF certificate

## Experience

---

### Owner/operator

#### Turf's Up! Property Maintenance – Gold Coast, Qld

For the previous ten years, I have run a successful small business. It has taught me responsibility, attention to detail, ability to direct others and to work outdoors in hot conditions.

### Field Assistant ActiveX – Brisbane, Qld

Performed portable XRF analysis over soil sampling grids and processed the data in preparation for entry into a database. 4WD skills were an essential part of the job.
