# Metals are where you find them

GEOLOGIST'S TRAVELS THROUGH SIX CONTINENTS

Peter Laznicka

This introduces the recently published book **“Metals are where you find them. Geologist’s travels through six continents”** (ISBN 978-80-7075-957-8) by Peter Laznicka that has been judged as “the most comprehensive popular geology of world’s metallic deposits in their regional, historical and socio-political framework” available. Combined with observations gained during 60 years of growing under changing political systems and international travels of the author, this is a massive book of 525 A4 pages with 1034 colour pictures and some maps, targeted on professional geologists, managers,

students and people with interest in minerals and special purpose travel. Peter Laznicka, born in Prague, lectured at the University of Manitoba and around the world, consulted for the resources industry, then co-founded, in Australia, the Data Metallogenica expert system about world' s mineral deposits, supported by miniaturized rock/ore samples (visit [www.dmgeode.com](http://www.dmgeode.com)).

Promoted personally to keep the book cost low, it would be much appreciated if you kindly convince your employer or library to buy a copy of the book and spread the word around. The recommended purchase method is by on-line downloading from [www.Payhip.com](http://www.Payhip.com) for USD 52 (**use either of these links:** [payhip.com/b/tWLM](http://payhip.com/b/tWLM), or [payhip.com/MetallogenicaAdelaide](http://payhip.com/MetallogenicaAdelaide)). After payment by common credit card or via PayPal please download the 106 MB pdf file). Other purchase alternatives and book description are in my website [www.metalsin6conts.net](http://www.metalsin6conts.net). Or write me at [plaznicka41@gmail.com](mailto:plaznicka41@gmail.com).

Thanks for your collegial assistance, Peter Laznicka, Adelaide.
