

Zero Emissions by 2050
We interrupt this program. .

Today, 21 April 2021,
this confused man,
Energy Minister Angus
Taylor, said this to the
media:

**“everyone knows
we want to get
to net zero by
2050”.**

**SINCE WHEN
HAS THIS
BECOME
GOVERNMENT
POLICY ??**

***At its simplest, this is a BONEHEADED
statement, which can cost the Coalition a
large chunk of its voting base***

Zero Emissions by 2050

We interrupt this program (2).

Believe it:

There is NO CLIMATE EMERGENCY

Believe it:

'Zero Emissions' = ECONOMIC SUICIDE

**And the essay provided by REAL
scientists Richard Lindzen and
William Happer can inform our
inept political class of the truth**
