by Ian Plimer

ISBN 9781925826593

Paperback, 440+ pages

It has never been shown that human emissions of the gas of life drive global warming. Large bodies of science that don't fit the narrative have been ignored by IPCC, COP and self-interested scientists paid by taxpayers. A huge subsidised industry of intermittent unreliable wind and solar electricity has been created based on unsubstantiated science. The same hucksters now want subsidised hydrogen, costly inefficient

EVs, subsidised mega-batteries and other horribly expensive tried and failed schemes to impoverish people, create unemployment, transfer wealth and enrich China. Germany, Texas, California and the UK had a glimpse of Net Zero with blackouts, astronomically high electricity costs and hundreds of deaths. We once had reliable cheap electricity and now that governments have gone green, we are heading for hard economic times.

In this book I charge the greens with murder. They murder humans who are kept in eternal poverty without coal-fired electricity. They support slavery and early deaths of black child miners. They murder forests and their wildlife by clear felling for mining and wind turbines. They murder forests and wildlife with their bushfire policies. They murder economies producing unemployment, hopelessness, collapse of communities, disrupted social cohesion and suicide. They murder free speech and freedoms and their takeover of the education system has ended up in the murdering of the intellectual and economic future of young people. They terrify children into mental illness with their apocalyptic death cult lies and exaggerations. They try to divide a nation.

The greens are guilty of murder. The sentence is life with no parole in a cave in the bush enjoying the benefits of Net Zero.

Emeritus Professor Ian Plimer is Australia's best-known geologist. He was Professor at Adelaide, Melbourne and Newcastle Universities and on the staff at New England, NSW and Macquarie Universities. He has published more than 120 scientific papers and was one of the 3 editors of the 5-volume Encyclopedia of Geology.
