

## Women & Leadership Australia

Women & Leadership Australia is offering partial scholarships to women leaders in the mining and resources sector to support participation in one of three leadership development programs. To make this opportunity available to more women, we have extended the deadline for applications to **15 December 2021**.

In many ways, women have been hit hardest by the pandemic. Many female-dominated sectors have been our front line. At home, remote learning and extra caring responsibilities have often fallen to women. And recent research shows that many employees have been re-evaluating their careers, feeling disconnected and burnt out at work, and may be considering a career change.

As we look towards 2022, it is vital for employers to support their women leaders through this period of change.

**Partial scholarships of \$1000-\$5000 per person are available for women in the mining and resources sector.**

These scholarships assist emerging, middle and senior women leaders to undertake leadership development programs commencing in 2021 and 2022. Our programs offer tangible and transformative support for women leaders at all levels. **Applications close 15 December.**

Further information is available here: <https://www.wla.edu.au/miningresources.html>

We encourage you to share this opportunity with SMEDG members. We have created a suite of social media tiles, images and wording you can use – simply [access this DropBox link](#).

Support from organisations like SMEDG makes a significant difference to the number of women who are able to access high quality leadership development opportunities. We appreciate your assistance and look forward to supporting more women leaders across the country.
