

**Stuart Hayward, Chief Geologist & Exploration Manager (B App Sc (Geol); MAIG) – Kingston Resources Limited**

Mr. Hayward is a geologist with over 35 years' experience in the minerals exploration and mining industry with a strong record of exploration and discovery, feasibility assessment, mineral resource estimation and geometallurgy modelling. In addition, he has extensive operating experience in world class Au and Cu-Au deposits in Asia Pacific, Melanesia, Latin America, Mexico, and Australia. He has expertise in minerals exploration and project evaluation across the epithermal to porphyry deposit continuum, and IOCG Cu-Au-U. He worked with Dr Greg Corbet in teaching epithermal and porphyry geology to industry professionals. He also provided consultant advisory and target generation services to PT Archi Indonesia in relation to Toka Tindung, a low sulphidation epithermal gold mine. In his roles as Exploration Manager and Chief Geologist with Kingston, he was a leading member of the team that delivered the 3.8Moz gold Resource at Misima Island (PNG) that is at the core of the 1.9Moz gold Reserve and DFS. He is a specialist in the development of minerals systems analysis as a foundational input across the mining value chain, and geoscience data mining. Mr. Hayward holds a Bachelor of Applied Science (Geology) from University of Southern Queensland and is a member of the Australian Institute of Geoscientists.
