

SMEDG Technical Meeting will be held at 5.30 pm for 6.00 pm on Thursday November 27 at the Club, and on Zoom. Zoom registration is required through [this link](#). As usual there will be dinner afterwards for those interested.

The Geological Survey of New South Wales sesquicentenary: a champagne year of achievement, change and growth.

This is the annual GSNSW Update, and will be presented by Phil Blevin and Dan Logan. Dan will be talking about Mineral Systems and developments at the W.B. Clarke Geoscience Centre, with Phil presenting the outputs and achievements of the Geological Survey in 2025, our 150th anniversary year. These include major changes in our core libraries and collections, geophysical acquisition, geological investigations in the Rockley Gulgong Belt, palaeontology, significant data releases, progress in our stratigraphic unit table program, and mineral commodity assessments.

The GSNSW continues to undertake first-class work, the results of which are available on their excellent [website](#).

Dr Phillip Blevin

Head of the Geological Survey of NSW
